

TWO PCAPS FOR UA-CTF IN NOV 2018 - ANSWERS

<http://malware-traffic-analysis.net/2018/CTF/index.html>

Internal network info for pcap 1 of 2:

- LAN segment: 192.168.2.0/24 (192.168.2.0 through 192.168.2.255)
- Domain: dnipromotors.com
- Domain controller: 192.168.2.4 - Dnipromotors-DC
- LAN segment gateway: 192.168.2.1
- LAN segment broadcast address: 192.168.2.255
- Windows client to investigate: 192.168.2.147

Suggested tasks and answers for pcap 1 of 2:

- Q: What is the MAC address of the Windows client at 192.168.2.147?
- A: MAC address: bc:5f:f4:a6:d1:29
- Q: What is the host name for the Windows client at 192.168.2.147?
- A: Host name: Lyakh-Win7-PC
- Q: Based on the Kerberos traffic, what is the Windows user account name used on 192.168.2.147?
- A: Windows user account name: jermija.lyakh
- Q: What is the URL that returned a Windows executable file?
- A: URL that returned a Windows executable: microsystem.com/hojuks/vez.exe
- Q: When did the URL happen? (date and time in UTC)
- A: Time of URL: 2018-11-13 at 0202 UTC
- Q: How many bytes is the Windows executable file returned from that URL?
- A: Size of the Windows executable: 699,392 bytes
- Q: What is the SHA256 file hash of the Windows executable file returned from that URL?
- A: SHA256 of the Windows executable:
43092b2993c9d9cfab01aa340bc378cad547ae0938c6803cb580271139798765
- Q: After receiving the Windows executable file, what IP address did the infected Windows host try to establish a TCP connection with?
- A: TCP connection attempted with 93.87.38.24 (twice), but no response from that IP address

TWO PCAPS FOR UA-CTF IN NOV 2018 - ANSWERS

Internal network info for pcap 2 of 2:

- LAN segment: 172.17.1.0/24 (172.17.1.0 through 172.17.1.255)
- Domain: kyivartworks.com
- Domain controller: 172.17.1.2 - Kyivartworks-DC
- LAN segment gateway: 172.17.1.1
- LAN segment broadcast address: 172.17.1.255
- Windows client to investigate: 172.17.1.129

Suggested tasks for pcap 2 of 2:

- Q: What is the MAC address of the Windows client at 172.17.1.129?
- A: MAC address: 00:1e:67:4a:d7:5c
- Q: What is the host name for the Windows client at 172.17.1.129?
- A: Host name: Nalyvaiko-PC
- Q: Based on the Kerberos traffic, what is the Windows user account name used on 172.17.1.129?
- A: Windows user account name: innochka.nalyvaiko
- Q: What URL in the pcap returned a Microsoft Word document?
- A: URL that returned a Word doc: ifcingenieria.cl/QpX8lt/BIZ/Firmenkunden/
- Q: When did the URL happen? (date and time in UTC)
- A: Time of URL: 2018-11-12 at 21:01 UTC
- Q: How many bytes is the Word document returned from that URL?
- A: Size of the Word doc: 73,088 bytes
- Q: What is the SHA256 of the Word document returned from that URL?
- A: SHA256 of the Word doc:
09ebe4229a74cdb1212671e6391742cc6bee387bf14da02974b07857b27f9223
- Q: What URL in the pcap returned a Windows executable file?
- A: URL that returned a Windows executable: timlinger.com/nmw/
- Q: How many bytes is the Windows executable file returned from that URL?
- A: Size of the Windows executable: 429,056 bytes
- Q: What is the SHA256 of the Windows executable file returned from that URL?
- A: SHA256 of the Windows executable:
69e731afb5f27668b3a77e19a15e62cce84e623404077a8563fcf61450d8b741
- Q: What type of infection occurred in this pcap?
- A: Type of infection: Emotet (Heodo)
- Q: In addition to HTTP post-infection traffic, what other type of post-infection traffic is generated by the infected Windows host?
- A: Encrypted SMTP traffic (over TCP ports 25 and 587 to several IP addresses that correlate with DNS queries for various mail servers)
